¹ The term "members" includes all regular and associate Exchange members, and member firms, general, special and limited partners in member firms, and voting and non-voting stockholders in member corporations.

² On the American Stock Exchange, all odd-lot transactions are handled by specialists, and their round-lot purchases and sales for odd-lot account are not segregated from their other round-lot transactions. In odd-lot transactions, customers' purchases are specialists' sales and customers' sales are specialists' purchases.

NOTE: All sales totals include short sales.

FORM 144 FILINGS FOR WEEK ENDED 06/15/73 1/

THE FOLLOWING FORMS 144 WERE PROCESSED IN THE SECURITIES/EXCHANGE COMMISSION FOR THE WEEK INDICATED ABOVE. ACCEPTANCE OF FORM 144 DOES NOT CONSTITUTE ANY FINDING THAT IT HAS BEEN FILED AS REQUIRED OR THAT THE INFORMATION SUBMITTED IS TRUE, CURRENT OR COMPLETE.

EXPLANATORY NOTES

Over-the-Counter Volume in Exchange Stocks

The volume of over-the-counter trading in exchange stocks (sometimes referred to as the "third market") is based on reports received from broker-dealers pursuant to Rule 17a-9 of the Securities Exchange Act which became effective on January 4, 1965 and was revised on April 1, 1967.

Rule 17a-9 requires that broker-dealers who make over-the-counter markets in common stocks traded on the New York Stock Exchange report quarterly their total third market sales of such stocks in which they make markets. They are also required to report certain over-the-counter sales of such stocks in which they do not make markets, as defined in the Rule. In addition, other broker-dealers must report any third market sales which amount to \$25,000 or more if no other broker-dealer intervened in the transaction. The reporting system is designed to reflect all sales to (or purchases by) persons other than broker-dealers, excluding inter-dealer transactions. Over-the-counter volume shown in the tables, therefore, represents sales to individuals and institutions. Secondary distributions and other syndicated offerings are excluded.

Broker-dealers who make markets in New York Stock Exchange common stocks are required to show separately any over-the-counter purchases and sales which involve members of the New York Stock Exchange. These transactions are made pursuant to Rule 19b-1 of the Securities Exchange Act and New York Stock Exchange Rule 394(b) which both became effective November 7, 1966. These sales are included with total over-the-counter sales.

In comparing total third market sales with New York Stock Exchange volume, it should be noted that exchange volume includes preferred as well as common stocks and also includes sales to specialists and other exchange members as well as sales to the public. Member trading on the New York Stock Exchange generally amounts to about 25% of total trading. In comparing third market volume and exchange volume in any given stock, it should be noted in addition that third market volume includes odd-lot transactions whereas exchange volume for individual stocks, as reported by the New York, the Midwest and the Pacific Stock Exchanges, does not include odd lots.

The 50 New York Stock Exchange stocks for which third market volume is shown were selected on the basis of their continuing high activity in the third market. The list of stocks is subject to change from time to time.

WORKING CAPITAL OF NONFINANCIAL U.S. CORPORATIONS, MARCH 31, 1973

The net working capital of nonfinancial U.S. corporations rose \$6.9 billion in the first quarter of 1973. This gain in working capital compares with \$5.3 billion the previous quarter and \$5.0 billion a year earlier. Net working capital, which represents the excess of business investment in current assets over current liabilities, totaled \$231.3 billion at the end of March 1973.

The first quarter increase in working capital resulted from a \$15.8 billion increase in total current assets which was partially offset by an \$8.9 billion rise in total current liabilities. Inventories posted a record quarterly gain of \$7.7 billion in the January-March period. In addition trade notes and accounts receivable increased \$5.1 billion, and other current assets rose \$1.8 billion.

The relatively liquid asset items, cash and U.S. Government securities, showed a combined increase of \$1.4 billion in the first quarter of 1973. The ratio of these two items combined to total current liabilities--a frequently used measure of corporate liquidity--was 20.7 percent at the end of March 1973, which represents a decrease of 0.1 percentage points from the previous quarter but an increase of 0.1 percentage points from the corresponding period of 1972.

On the liabilities side of the balance sheet, other current liabilities recorded a gain of \$5.7 billion during the first quarter of 1973. This gain was accompanied by increases of \$1.9 billion in Federal income tax accrued and \$1.2 billion in notes and accounts payable.

In the first quarter of 1973, manufacturing corporations increased their net working capital \$7.1 billion. The net effect of the other nonfinancial industries was to reduce this net working capital level for all nonfinancial corporations by \$0.2 billion.

In addition to the \$6.9 billion added to corporate working capital in the January-March 1973 period, corporations invested approximately \$21.0 billion for additions to plant and equipment in the United States, and \$3.0 billion in other noncurrent assets including fixed assets of foreign subsidiaries. In order to finance these long-term capital requirements, corporations obtained nearly \$23 billion, or three-fourths of the required funds, from internal sources--depreciation and retained earnings--compared with nearly 60 percent for the entire year 1972. External financing consisted of \$1.8 billion from net new stock issues and \$1.7 billion from net sales of debt securities. The balance of the financing, \$3.8 billion, was provided by long-term bank and mortgage loans.

The accompanying table contains the aggregate estimates of current assets and current liabilities of U.S. nonfinancial corporations.

^{1/} Year-end data for this series are based on Statistics of Income data through 1969, which cover virtually all corporations in the United States. Statistics of Income data may not be strictly comparable from year to year because of changes in the tax laws, basis for filing returns, and processing the data for compilation purposes. All interim quarterly data and year-end estimates after 1969 are based on data compiled from many different sources, including data on corporations registered with this Commission.

^{2/} Includes time certificates of deposit.

^{3/} Includes Federal agency issues.

^{4/} Receivables from and payable to the U. S. Government do not include amounts offset against each other on corporations' books or amounts arising from subcontracting which are not directly due from or to the U. S. Government. Wherever possible, adjustments have been made to include U. S. Government advances offset against inventories on corporations' books.

^{5/} Includes marketable investments (other than Government securities and time certificates of deposit) as well as sundry current assets.

NOTE: Figures are rounded and will not necessarily add to totals.
